The Report of Business Sector Lecture Series – XIII (26/10/2021)

Jamal Institute of Management organized on the topic of CYBER CRIME AND SAFETY AWARENESS on 26th October, 2021. Cybercrime is on the rise, and it has become a major concern. Cybercrime, like the world of digital technology, is always progressing. The COVID-19 pandemic renders individuals and society extremely vulnerable in all respects. During this crisis, we all rely more than ever on computer systems, mobile devices and the Internet to work, communicate, shop, share and receive information. There is a need to make awareness about the scourge of cybercrime, particularly among the youth, who are the tech-savvy and use the technology more. Cybercrime has arisen as a serious global concern, and raising awareness is essential among the general public, particularly among the youth. Keeping this in mind, this lecture was organized and aims to educate students on the cyber threats faced.

More people are being attacked by cybercriminals as a means to earn more money.. These are today's criminals who are constantly looking for ways to break into systems by exploiting human error and system vulnerabilities. Guest speakers talk about how people around the world are being attacked, including various types of cybercrime, online fraud and identity theft scams on online platforms, and leaking personal information through social media platforms etc.

He also shared several cybercrime cases from his personal experience. Moreover he talked about more common cybercrimes such as phishing ,hacking, data theft, identity theft, Malware, computer viruses, data breach, and cyber stalking and then informed us about ways to keep ourselves safe from such crimes and ways to approach the Cybercrime units if ever such a situation arises.

He elaborated about the most common frauds that are faced by the youth for instance Job frauds, ATM frauds, Identity theft via social media and also harassment faced due to catfishing on social media. He then informed the participants on how to identify such kind of frauds and how to keep ourselves safe in today's virtual age. The most popular social media sites like Facebook, Twitter, Instagram.

He emphasised that youth should be careful of who they are communicating with online and refrain from as long as any type of personal information to persons they do not identify and trust. He expressed his concern as young people have no nervousness baring complex details of their life on Twitter, Facebook, Whatsapp, Instagram and Snapchat. They likely to make silly or mean comments on other people's websites. Often they join false clubs and forums online, chat with the strangers, share pictures of themselves, and risk their personal information by entering their private details on their mobiles, tabs, laptops and other devices. They become easy targets for Cyber Criminals, they also put their families and loved ones at risk.

Though not all people are victims to Cyber Crimes, they are still at risk. Crimes by computer vary, and they don't always occur behind the computer, but they executed by computer. The hacker's identity is ranged between 12 years young to 67 years old. The hacker could live three or four continents away from its victim, and they wouldn't even know they were being hacked. Crimes done behind the computer are the 21st century's problem. With the technology increasing, criminals don't have to rob banks, nor do they have to be outside in order to commit any crime. They have everything they need on their lap. Their weapons aren't guns anymore; they attack with mouse cursors and passwords. So he advised that individuals should avoid disclosing any information pertaining to them, always avoid sending any picture online especially to strangers and chat friends as there have been incidents of misuse of pictures. Always use current and updated anti-virus software to guard against virus attacks. Always save back up volumes so that one may not suffer data loss in case of virus corruption. Never ever send your credit card or ATM Card numbers to any site or to any stranger, this is not secured to guard against frauds. He further warned to lookout on the sites our children are accessing to avoid any kind of harassment in children. It is much better to use a security programme that gives control over the cookies and send all the information back to the site as leaving the cookies unguarded might prove lethal.

The session was attended by over 80 students from MBA department. The talk generated lot of curiosity among the students. Students asked many questions at the end of the talk. On completion of the question & answers session DR.A.S.Thoufiq Nishath thanked the Guest speakers for sparing his valuable time and imparting valuable knowledge on such an important topic. The session was well appreciated by the audience.
