About N-LIST

Background

The Project entitled "National Library and Information Services Infrastructure for Scholarly Content (N-LIST)", being jointly executed by the e-ShodhSindhu Consortium, INFLIBNET Centre and the INDEST-AICTE Consortium, IIT Delhi provides for i) cross-subscription to e-resources subscribed by the two Consortia, i.e. subscription to INDEST-AICTE resources for universities and e-ShodhSindhu resources for technical institutions; and ii) access to selected e-resources to colleges. The N-LIST project provides access to e-resources to students, researchers and faculty from colleges and other beneficiary institutions through server(s) installed at the INFLIBNET Centre. The authorized users from colleges can now access e-resources and download articles required by them directly from the publisher's website once they are duly authenticated as authorized users through servers deployed at the INFLIBNET Centre.

N-LIST: Four Components

The project has four distinct components, i.e. i) to subscribe and provide access to selected e-ShodhSindhu e-resources to technical institutions (IITs, IISc, IISERs and NITs) and monitor its usage; ii) to subscribe and provide access to selected INDEST e-resources to selected universities and monitor its usage; iii) to subscribe and provide access of selected e-resources to Govt./ Govt.-aided colleges and monitor its usage; and iv) to act as a Monitoring Agency for colleges and evaluate, promote, impart training and monitor all activities involved in the process of providing effective and efficient access to e-resources to colleges.

The INDEST and UGC-INFONET are jointly responsible for activity listed at i) and ii) above. The INFLIBNET Centre, Gandhinagar is responsible for activities listed at iii) and iv) above. The INFLIBNET Centre is also responsible for developing and deploying appropriate software tools and techniques for authenticating authorized users.

Note: From Year 2014, N-LIST programme is subsumed under e-ShodhSindhu Consortium as college component. The colleges (except Agriculture, Engineering, Management, Medical, Pharmacy, Dentistry and Nursing) in India are eligible to get access e-resources under N-LIST programme.

STUDIO EQUIPMENTS

The **D7500** is **Nikon's** second-best DX body DSLR packed with the professional quality components seen in the flagship DX camera, the D500. The D7500 is one of the best DX bodies they've ever made with it likely to be one of the last DX DSLRs produced as everything slowly turns mirrorless.

Canon EOS 200D Performance, image quality. Burst shooting was at 4.9fps in my tests, which is faster than the 100D but slower than the 800D's 6fps. Burst with continuous autofocus came in at 3.1fps. With plenty of detail and nicely controlled noise from its 24-megapixel sensor, image quality was good, too.

The **Panasonic AG-HVX200A** is a P2-based camera that answers the demands of nearly any professional videographer. The camcorder builds on the overwhelming success of the original AG-HVX200, with the addition of some much sought-after revisions. The most important new feature is an updated sensor, which yields higher sensitivity, creating less noise in low-light situations.

The **Yamaha 01V96** provides full 24-bit 96 kHz operation, providing premium dynamic range and sonic character.

The **rack-mountable 18i20** gives you 18 inputs and 20 outputs of incredible sound quality. Enough to turn any space into a fully-fledged recording studio. Why We Love It: Mic preamps renowned for their clarity.

Yamaha MSP5 Studio is a two-way bi-amplified bass reflex system that delivers outstanding monitoring precision for digital or analog production in stereo or surround formats. The more compact dimensions of the MSP5 Studio make it an ideal choice for smaller project studios and DAW based production systems.
