

Effective Implementation of ERP

The college has a unique ERP system which is a technology-based software to store, analyse, manage, and supervise the data. It also helps in smoother operations and better internal communication alongside maintaining transparency. Our college ERP System manages the data related to their students, staff and administration.

On the direction of Governing Council, our institution has effectively implemented *Enterprise Resource Planning (ERP)* for the effective e-Governance and Learning Management System (LMS).

College Enterprise Resource Planning (ERP) has a MyCamu App with the integration of Microsoft Team software for doing all academic activities like the Online Teaching- Learning process, and administrative details of all the Staff and Students.

General Administration

Our College ERP system has all the features which includes Attendance Management, Staff management, Time Table management, Fees and accounting management, SMS and Email alerts for parents, teachers and students.

Student Admission

The eligibility and admission procedures are displayed in the website and students can apply the programmes through Mycamu. It scrutinizes the application forms based on the government norms and shortlisted students are intimated through Short Messaging Service (SMS). The online fee payment facility is also given through it.

Student Portal

It is enabled with the student profile which includes basic information like name, photograph, register no, roll no, parental details, communication information, date of birth, blood group, community, Part V activities, language selected, extra credit paper details and also includes assignment submission, regular class schedule and time table, examination notification, student notice board (events, holidays), online payment and receipts, attendance records and leave management.

Attendance

It helps to avoid the need to have an attendance register or on-paper attendance anymore! Attendance management features in the college ERP system lowers the burden on teachers and enables them to mark attendance through the App and Students are also given the facility to apply leave or On Duty. The attendance software indicates those students who are not eligible to appear for an exam due to low attendance.

Fees Management and Accounts

Managing the fees and accounts for colleges is a tedious task. The college ERP system has the feature for Fees Management and Accounting. Students can pay their college fee and examination fee through ERP. College accounts are maintained with Tally and Excel software. Transaction of Government funds, scholarships transfer through Public Financial Management System (PFMS) and submission of interest of the projects submitted to Bharat Khoshik.

Staff portal

It includes the staff profile, date of appointment, education details, employment details, class schedule, time table, teaching plan and content, assignment list, assignment tracker, assignment approval, download reports and communication messages to students. The College ERP system should also let you know about the allocated lectures for a particular faculty, and the lectures delivered.

The ERP system has become the backbone of the college in both administration and academic activities of the college.
