OFFICE OF THE CONTROLLER OF EXAMINATIONS

Steps to Calculate the Attainment of Programme Specific Outcome

1. The CIA and ESE marks are normalized to a common scale value of 100.
2. From the above normalized values, a weightage of 40% is assigned to the CIA Component and a weightage of 60% is assigned to the ESE component.
3. These values are summed up to get an OBE score. An OBE scale value of 1 to 4 and the level of attainment (Low, Moderate, High and Excellent) by a student on a specific course is determined based on this score. This is shown in Table 1.
4. A mean of the OBE scale value for all the students indicate the attainment level of the particular course. This is shown in Table 2.
5. The mean of the OBE scale value for all the courses of a specific programme determines the attainment level of that specific programme. This is shown in Table 3.

Table 1: Weightage by students and scale used to assess the attainment for UG

Weightage obtained	Scale used	Level of attainment of Outcome
0 - 49	1	Low
50 - 74	2	Moderate
75 - 94	3	High
95 - 100	4	Excellent

Table 2: Scale used to assess the Course Outcome for UG

Scale used	Level of attainment of Outcome
0 - 1.0	Low
1.1 - 2.0	Moderate
2.1 - 3.0	High
3.1 - 4.0	Excellent

Table 3: Scale used to assess the Program Specific Outcome for UG

Scale used	Level of attainment of Outcome
0 - 1.0	Low
1.1 - 2.0	Moderate
2.1 - 3.0	High
3.1 - 4.0	Excellent
